A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An Epic is a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

A Story is a small task. It is part of an Epic.

A Story Point is a number that represents how much effort a story takes to complete. (Usually in form of Fibonacci series)

Very Easy task

Easy task

Moderate task

Difficult task

Sprint 1: (5 Days)

Data Collection and Cleaning

       Collection of iPhone market data – 2

       Cleaning and formatting datasets – 2

Data Understanding

       Exploratory analysis of iPhone sales, prices, and regions – 3

       Grouping data by year, model, and region – 2

Sprint 2: (5 Days)

Tableau Development

       Building Worksheets (bar, line, pie, map) – 3

       Designing Dashboards – 5

       Creating Tableau Story – 3

Submission and Reporting

       Project report documentation – 3

       Taking Screenshots and Drive upload – 2

Total Story Points

Sprint 1 = 9

Sprint 2 = 13

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = 9 + 13 = 22

No of Sprints = 2

Velocity = 22 / 2 = 11 Story Points per Sprint

Your team's velocity is 11 Story Points per Sprint.
